NAME
    dskacc, mdskacc - get number of disk accesses

SYNOPSIS
    dskacc()

    mdskacc()

DESCRIPTION
    dskacc returns number of disk accesses of current process and its
    children since its last call

    mdskacc is identical to diskacc except it is used by the measur-
    ment subroutines

LIBRARY
    /lib/lib1.a
