## IDEALink Host Software

### System/38 and AS/400

Note that the System/38 software for IDEALink in this package is in two diskettes, not one. To install software on the host from the two diskettes:

1. For the AS/400 only, enter **CALL QCL**.
2. Enter **CRTLIB DLINK** to create the IDEALink library.
3. Insert diskette 1 of 2 into slot 1 of the host disk drive.
4. To restore the files, enter:

```
RSTOBJ OBJ(*ALL) SAVLIB(DLINK) LOC(*S1) VOL(*MOUNTED) MBROPT(*ALL)
```

5. Insert diskette 2 of 2 into slot 1 of the host disk drive.
6. Repeat step 4.
7. Follow the instructions for first time installation on page B-3 or C-3 of the IDEALink host operations guide.
